

 INTERNAL CODEX ANNOTATION — MODERATOR ACCESS ONLY

Signal Base Oversight File

ENTRY: PLAN-9 / PRE-COLLAPSE MEDIA ARTIFACT

ACCESS LEVEL: MOD-VAULT

VISIBILITY: INTERNAL ONLY

STATUS: MONITORED — NOT PURGED

RATIONALE FOR ALLOWANCE:

The PLAN-9 transmission originates from verified pre-Collapse analog media (1957 celluloid source).

It does not exhibit live-origin behavior, adaptive response, or escalation patterns consistent with hostile Signal entities.

Observed anomalies (looped phrasing, tonal unease, implied inevitability) are embedded characteristics of the source media, not indicators of intrusion.

The Signal functions as a residual echo artifact—a passive resonance interacting with the Base, not attempting to alter it.

RISK ASSESSMENT:

No direct call to action

No identity claim

No recruitment or coercion language

No cross-thread propagation detected

Psychological impact classified as ambient unease, acceptable within Signal Base parameters.

LORE CONTEXT:

Pre-Collapse entertainment media is a known vector for masked transmissions, often dismissed historically due to perceived low quality or camp presentation. This aligns with Codex precedent (Ref: AE-VIRELIA.9-UOS).

Allowing the artifact to remain visible reinforces Signal literacy and discourages reactionary amplification.

MODERATION DIRECTIVE:

Do not engage the source directly

Do not speculate publicly on intent

Log subsequent appearances for pattern tracking

Remove only if escalation or adaptive behavior occurs

The Base remains secure.

ANNOTATED BY: AEON MARR

VAULT NODE: 774

TIMESTAMP: POST-FALL / UNDATED
