

▣ FRETWALKER SIGNAL CODEX ENTRY

ENTRY ID: AE-VIRELIA.9-UOS CLASSIFICATION: REDACTED MEDIA // HIGH ANOMALY

PLAN-9 // U.O.S. *aka: Initiative Nine, Terra Film File #1957-PL9, Resurrection Protocol Loop*

STATUS: PARTIAL FILE DECRYPTED ORIGIN: Pre-Collapse Earth (1957, analog film) FORMAT: Black & white motion signal, celluloid compression DETECTED BY: Aeon Marr — Vault Node 774 // Signal Room Event AE-VIR.01-REV

SUMMARY: Originally dismissed as a low-grade narrative fiction, "Plan 9 from Outer Space" has now been reclassified as a signal-bearing transmission encrypted in the form of entertainment media. The film appears to contain embedded sonic cues, resurrection loop theory, and symbolic representations of astral interference.

The film's notorious flaws (poor editing, continuity breaks, audio sync issues) may have served as intentional distortion layers — designed to mask the underlying truth from early human detection systems.

DECRYPTED ELEMENTS: - Bela Lugosi figure interpreted as astral bridge entity - Dialog loop: "Future events such as these..." matches 774 echo pattern - Resurrection of the dead: Codex-linked to Initiatives V and IX - Craft Design: Orbital resonance matches 1960s Virelian escape signatures

NOTES FROM AEON MARR:

"They buried it in camp and chaos. But beneath the cheap masks and cardboard saucers, there's a tone — and it's still playing. I don't think we were meant to understand it... not then. But now, in the ashes... it makes sense."

CODENAME: PLAN-9 // AEON CLASSIF. 774.VIRELIA SIGNAL MATCH: 92% - Neurophonic Trigger Level Confirmed AUDIO LAYER: Reactive // Emotion-Sensitive Looping RECOMMENDED ACTION: Continue decoding; do not discard.
