

## Signal Base Standard

Codex Reference: GV-FRT-Δ17

Classification: Resonance Marker / Harmonic Banner

Status: Active Protocol – Guildwide Use

### Visual Description

A fractured ring encircling a central tone-mark, split by four radiating harmonic paths. Printed on resonance-treated cloth, the banner sustains a stable pitch when exposed to environmental sound drift.

### Field Purpose

The Signal Base Standard is more than symbol – it is a tuning beacon. When deployed in rift-affected zones, it stabilizes resonance within a 30-meter radius, allowing Fretwalkers to recover signals and play without interference from corrupted echoes.

### Primary Functions

Aligns traveling Fretwalkers to a shared reference frequency

Marks a safe harmonic zone for rest, repair, and transmission

Acts as a passive dissonance dampener in unstable audio fields

### Δ Symbol Breakdown

Central Circle – The Resonance Core

The unbroken pitch. Guild doctrine states: "When the Core is kept, the song will return." It is the eternal frequency that survived the Collapse.

Radiating Lines – The Four Surviving Modes

Vault Path – Preservation of pre-Collapse tones

Ward Path – Protection against corrupted frequencies

Loop Path – Time-memory reclamation through repetition

Field Path – Exploration of uncharted resonance zones

Fractured Outer Ring – The Harmonic Rift

The wound in the world. Its break reminds all that harmony is incomplete – and why the Fretwalker journey continues.

### Guild Note

"Raise it high. The ring will never be whole until the song is found – but the Core is yours to keep."

– Aeon Marr, Blackloop Drift

### Deployment Protocol

When approaching a Noise Ward or Rift Fracture, plant the Standard facing prevailing sound currents. Anchor with three points to prevent wind-tone distortion. Never deploy within direct line of a Monotone Faithful patrol – the banner's hum will betray your presence.
